Professional Summary

Technical professional with a background in mining and metallurgy, currently pursuing a degree in Industrial Maintenance Engineering. Experienced in quality coordination, production process control, technical documentation and operational deviation analysis. Skilled in developing Python-based tools to automate technical documentation, analyze operational data, monitor KPIs and support the digital integration of quality controls. Oriented toward operational reliability, continuous improvement and process standardization.

Professional Experience

QUALITY COORDINATOR | MAFOR S.A. | SANTIAGO, CHILE | MARCH 2026 – AUGUST 2026

- Coordinated quality assurance activities, component inspections and control of critical production conditions to support operational continuity.
- Developed Python and Streamlit tools to analyze operational data, monitor KPIs and automate technical data sheets using cost, raw material and labor-hour databases.
- Standardized deviation-response protocols, improving corrective-action traceability, document control and compliance with quality criteria.
- Trained new quality inspectors on production processes, raw materials, control methods and technical acceptance criteria.
- Reviewed Technical Office drawings and production requirements, verifying alignment with information provided by the Sales Department.
- Consolidated quality controls by sales order and prepared production and industrial-trial reports for suppliers.
- Defined inspection parameters, tolerances and functional rules with IT to support the digital integration of quality controls.
- Audited press operating parameters and supported Oracle NetSuite ERP data preparation, improving standardization and operator-facing information.

QUALITY INSPECTOR | MAFOR S.A. | SANTIAGO, CHILE | 2025 – FEBRUARY 2026

- Performed RCA on production line failures, identifying mechanical and operational deviations and proposing preventive actions to reduce recurrence.
- Prepared technical manuals and inspection procedures to support equipment integrity, maintenance routines and safe execution.

PRODUCTION ASSISTANT | NANO QUANTUM GROUP SPA | 2025

- Monitored leaching and electrowinning recovery cycles, controlling operational variables to support process continuity, safety and performance.
- Supported chemical handling and plant operation in accordance with industrial safety and risk-control procedures.

PROFESSIONAL INTERNSHIP | MINISTRY OF PUBLIC WORKS, ROADS DEPARTMENT | 2024

- Performed supervised geotechnical and materials tests, including compaction, particle-size distribution, consistency limits and concrete specimen compression.
- Accompanied field sampling activities and supported technical documentation reviews for laboratory tender processes.

Education

Universidad Técnica Federico Santa María

Industrial Maintenance Engineering | In progress, 2025 – present

University-Level Technician in Mining and Metallurgy | Graduated, 2024

Additional Skills

- **Technologies and software:** Python, Streamlit, AutoCAD, Civil 3D, MS Project, Microsoft Office and Oracle NetSuite.
- **Technical competencies:** root cause analysis (RCA), preventive and corrective maintenance, operational reliability, process control, industrial safety, document management, KPI tracking and continuous improvement.

Languages

- Spanish: native.
- English: intermediate, with technical reading comprehension.
